

Hirael Release Notes

Version 7.4, October 2026

This release adds an event calendar, a filter builder, a date and time picker and a data grid.

Every component ships for Radix UI and Base UI, adopts your shadcn theme, and works right to left.

What's new

- Event Calendar: month, week, day and agenda views
- Filter Builder: Linear-style filters with `applyFilters`
- Data Grid: editable cells, sorting and paste
- Map: MapLibre with light and dark basemaps
- Flow Canvas: React Flow with your tokens
- PDF Viewer: the viewer you are using now

Install

```
npx shadcn add https://hiracl.com/r/pdf-viewer.json
```

Each item copies its source into your project,
so you own and can change every line.

Thanks for reading.
